

# Information on product safety

The product

## OLI-CELL Schnellschliffgrund 1.42 (Quick sanding primer)

is to be labelled as „Xi – Irritant“ with regard to health hazards, according to the current EC classification categories and the Ordinance on Hazardous Substances (no labelling as toxic, harmful, corrosive, carcinogenic, teratogenic, mutagenic)

We confirm that, according to our knowledge, the product OLI-CELL Schnellschliffgrund 1.42 does not contain any substances in its formulation that contain contaminations or proportions of e.g. PCP (pentachlorophenol), HCH (lindan), dioxin, PCB (polychlorinated biphenyls), formaldehyde or zinc organic compounds.

The product OLI-CELL Schnellschliffgrund 1.42 is in compliance with the relevant standards for toys according to DIN V 53160-1/-2 (saliva and sweat proof), DIN EN 71/3 (limits of migrating heavy metals), and is free of chemical-organic compounds according to DIN EN 71/9 (colorants according to table 2 B, primary aromatic amines according to table 2 C, wood preservatives according to table 2 G (a), (b)).

According to article 33 of the Regulation no. 1907/2006 (REACH), we have the duty to submit information on “substances that are a special cause of concern”. The formulations by Oli Lacke GmbH do not contain any substances listed in article 59(1) of the Regulation no. 1907/2006/EC (cf. web address of the European chemicals agency at <http://echa.europa.eu/>) above 0,1 w%.

When using the product, you have to keep to the minimum work/hygienic standards required when working with solvent-containing products.

Lichtenau, 19.10.2011

Oli Lacke GmbH
